METALLURGIST
Numbers 1-12, 1959

METALLURGIST

*A translation of METALLURG, the monthly
industrial technical journal of the
Ministry of Iron and Steel of the USSR*

Russian Original Dated January, 1959

No. 1, pp. 1-44

January, 1959

CONTENTS

	PAGE	RUSS. PAGE
Before the Twenty-First Communist Party Congress of the Soviet Union	2	1
Automation of Production Processes in the Iron and Steel Industry of the USSR. <u>A. V. Leskov</u> .	4	4
BLAST-FURNACE PRODUCTION		
The Reduction of Sulfur Content in Pig Iron in the Course of the Blast-Furnace Process. <u>I. I. Korobov</u>	7	7
Utilization of the Water from Slag Granulation for Cooling the Blast Furnace. <u>Cand. Tech.</u> <u>Sci. T. T. Nesterenko</u>	9	9
Tightening the Charging Hopper. <u>V. P. Emel'yanov</u>	10	10
STEELMAKING		
The Effect of Some Technological Factors on the Quality of Structural Steel. <u>K. K. Prokhorenko</u> , <u>N. P. Shchekin, and S. M. Sergienko</u>	11	11
Improved Lining of Electric Furnaces. <u>A. N. Glazov and V. I. Mesyats</u>	14	14
Quality of 9.75-Ton Rail-Steel Ingots. <u>S. Ya. Skoblo, E. A. Kazachkov, E. G. Pereverzeva,</u> <u>Yu. I. Keryushkin, V. G. Strakhov, F. F. Sviridenko, M. T. Bul'skii, and A. G. Alimov</u> . .	18	19
ROLLED STEEL AND TUBE PRODUCTION		
Butterfly-Type Passes for Rolling H-Beams. <u>I. I. Kuchko and N. P. Kudryavtsev</u>	19	20
An Improvement of the Pass Design for Rolling R-5 Rails. <u>M. M. Polyakov, L. N. Skachkov,</u> <u>and N. I. Pindyurin</u>	21	22
The Operation of Reheating Furnaces of Continuous Mills. <u>M. S. Kruskal' and V. V. Getmanets</u>	23	24
Improving the Conditions of Annealing Sheet Steel in Muffle Furnaces. <u>V. P. Emel'yanov</u> . .	26	27
ORGANIZATION OF PRODUCTION IN THE FACTORY		
Organization of Production Quality Control. <u>I. I. Sergeev and A. I. Khmelik</u>	27	28
Letter to the Editor	29	30
Improvements in Transport Facilities at the Chelyabinsk Metallurgical Works. <u>S. N. Bystrov</u> <u>and S. A. Sanpiter</u>	30	30
With Our Friends	32	33
FROM THE HISTORY OF TECHNOLOGY		
The Satka Metallurgical Works is Now Two Hundred Years Old.	34	34
METALLURGY ABROAD		
Some Features of Pig-Iron Production in China. <u>A. M. Petrichenko and E. A. Kukhodol'skaya</u> .	38	37
Announcements	42	40
New Books	43	back cover

METALLURGIST

*A translation of METALLURG, the monthly
industrial technical journal of the
Ministry of Iron and Steel of the USSR*

Russian Original Dated February, 1959

No. 2, pp. 45-88

February, 1959

CONTENTS

	PAGE	RUSS. PAGE
Entering the First Year of the Seven-Year Plan. <u>S. M. Filippov</u>	46	1
Blast-Furnace Production		
Production of Nodules from the Charge Containing Pyrite Cinders. <u>S. V. Barilevich and B. L. Lazarev</u>	49	4
The Automatic Determination of the Composition of Peripheral Gases in the Blast Furnace and the Control of the Blast-Furnace Operation. <u>Z. I. Nekrasov and Ya. M. Obodan</u> . . .	52	7
Steelmaking		
Rapid Filling of the Hot-Top of Plate Ingots. <u>G. A. Chikalenko and T. I. Oleshkevich</u>	56	11
Inter-Works Course on Open-Hearth Repairs and on the Maintenance of Open Hearth Furnaces. <u>G. F. Germanidze and V. G. Pushkov</u>	58	13
The Use of Oxygen on Furnace-Bottom Repairs and the Increase in the Durability of the Bottom. <u>N. L. Lapin</u>	60	16
Practices of the Kazakh Metallurgists. <u>N. Ishmukhamedov</u>	63	19
Rolled Steel and Tube Production		
New Rolling Mills. <u>A. I. Tselikov, E. S. Rokotyan, and E. R. Shor</u>	65	21
Modernization of the Roughing Train of the Light-Section Mill. <u>L. M. Kochetov</u>	69	25
Ragging the Rolls of Roughing Mills. <u>N. M. Vorontsov and B. M. Barbashin</u>	70	27
Short-Flame High-Pressure Burner. <u>V. D. Esipov</u>	71	28
Hardware Production		
The Manufacture of Rivet Wire From 30KhGSA Alloy Steel. <u>Ya. Kh. Sartan</u>	75	32
The IIIrd International Conference of Workers of the Metallurgical and Machine-Building Industries. <u>V. A. Podzerko</u>	76	34
From the History of Technology		
75th Anniversary of the "Serp i Molot" Works. <u>N. P. Zhetvin and L. N. Podvoiskii</u>	79	36
IInd Plenary Meeting of the Central Committee of the Trade Union of the Workers of the Metallurgical Industry	82	38
Metallurgy Abroad		
More About Ways of Reducing the Weight of Ingot Hot Tops	83	39
NEW BOOKS	84	
SENIOR MILL OPERATOR, IVAN ALEKSEEVICH SOMOV.	85	

METALLURGIST

*A translation of METALLURG, the monthly
industrial technical journal of the
Ministry of Iron and Steel of the USSR*

Russian Original Dated March, 1959

No. 3, pp. 89 - 134

March, 1959

CONTENTS

	PAGE	RUSS. PAGE
We Shall Fulfill the Tasks of the Seven-Year Plan Ahead of Time	91	1
THE BLAST-FURNACE INDUSTRY		
Improved Preparation of Small Coke. <u>V. V. Vinogradov</u>	93	3
The Automatic Control of the Composition and Temperature of Gas over the Horizontal Cross Section of the Blast Furnace. <u>Z. I. Nekrasov and Ya. M. Obodan</u>	95	5
Charging Equipment with Double-Wall Cone. <u>I. L. Kordabnev</u>	97	7
Reducing the Sulfur Content in Pig Iron. <u>P. M. Matveev</u>	100	10
THE STEELMAKING INDUSTRY		
Experience on the Application of Open-Hearth Sinter. <u>B. G. Petukhov and P. K. Morokov</u>	101	11
Moisture Content of the Gases in the Working Space of the Open-Hearth Furnace and the Hydrogen Content in the Steel. <u>K. T. Kurochkin, B. A. Baum, A. F. Kononov,</u> <u>V. V. Postyka, and S. M. Kirov</u>	106	16
Increasing the Charge of the Bessemer Converters at the "Krivorozhstal" Works. <u>B. E. Gurevich</u> . . .	109	19
The Mechanization of Labor-Consuming Operations at the Magnitorsk Metallurgical Combine <u>A. M. Emel'yanova and V. P. Emel'yanov</u>	111	21
ROLLED AND TUBULAR PRODUCTS		
New Technological Processes in Steel Rolling. <u>A. I. Tselikov, E. S. Rokotyan, and E. R. Shor</u>	113	23
Change in the Roll Design for Rolling the No. 4 Die Section. <u>M. V. Shuraev and</u> <u>S. G. Nekrasov</u>	116	26
The Production of Thick-Walled Tube Billets on Tube-Rolling Mills. <u>A. B. Ivanov</u>	118	28
The Mechanization of Labor-Consuming Operations at the Magnitorsk Metallurgical Combine. <u>V. P. Emel'yanov</u>	122	31
MISCELLANEOUS PRODUCTS		
Equipment for Entering the Rod into the Die. <u>G. M. Fomin</u>	124	33
The Efficiency of Steel Ropes. <u>B. M. Vorontsov</u>	126	34
PRODUCTION ORGANIZATION IN FACTORIES		
The Storage of Spare Parts of Equipment	127	36
A Rational Utilization of Welding Slags. <u>G. P. Peichev and N. S. Kormilitsyn</u>	129	37

CONTENTS (continued)

	PAGE	RUSS. PAGE
FROM THE HISTORY OF TECHNOLOGY		
The History of Furnace Technique in Russia. <u>L. B. Gol'denberg</u>	130	38
METALLURGY ABROAD		
A Visit to Korean Metallurgists. <u>P. Druzhinin</u>	132	39
NEW BOOKS	133	40

METALLURGIST

*A translation of METALLURG, the monthly
industrial technical journal of the
Ministry of Iron and Steel of the USSR*

Translation published November, 1960

No. 4, pp. 137-180

April, 1959

CONTENTS

	PAGE	RUSS. PAGE
We Shall Fulfill the First Year of the Seven-Year Plan Ahead of Time	137	1
BLAST FURNACE PRODUCTION		
Operation of the Blast Furnace with Size-Graded Fluxed Sinter. S. K. Trekalo, N. M. Yakubtsiner and A. B. Shur.	139	3
Increasing the Durability of the Switches of the Hot-Blast Mains. I. A. Ivanov.	143	7
Increasing the Operating Efficiency in the Charge Section of the Blast-Furnace Shop. K. M. Kinyapin and L. Ya. Shparber.	143	8
STEELMAKING		
Improving the Quality of Steel. D. A. Smolyarenko.	145	9
The Use of Silicochromium for the Production of Chromium Steel. V. E. Sokolov, V. I. D'yachkov, A. E. Sokolov, and I. G. Fadeev.	148	12
The Use of Titanium-Containing Wastes Instead of Ferrotitanium. V. A. Khryukina, M. G. Bryunetkin, E. I. Korablev, and L. A. Kamkina.	151	15
The Effect of the Thickness of the Plates Inserted Between Bricks on the Service Life of Roofs. E. M. Tsygankov and M. F. Ratnikov.	154	17
Universal Scraping Machine for the Removal of Hot Slag. V. Z. Lavrenov.	156	20
Modernization of Electric-Arc Furnaces. P. M. Rutberg and A. I. Sapko.	158	21
ROLLED STEEL AND TUBE PRODUCTION		
Improved Design of Blooming Mill Rolls. L. V. Andreyuk and M. I. Igon'kin.	160	23
Improvements on the Continuous Billet Mill. I. P. Shulaev and M. A. Vysotskii.	162	25
Rational Roll Accessories for Continuous Section Mills. B. V. Khovrin and V. V. Getmanets.	163	26
A Design of Piercing-Mill Rolls with a Minimum Angle of the Delivery Cone. V. Ya. Ostrenko, P. I. Vatutin, E. I. Ulinskaya, and N. S. Kirvalidze.	167	30
Piercing the Holes in Rail-Joint Bars. G. P. Efimov.	169	32
Machine for Turning Blooms at the Billet Store. A. V. Babushkin.	170	33
METALLURGY ABROAD		
The Tube Industry at the 1958 Leipzig International Fair. Yu. N. Kozhevnikov.	172	35
NEW BOOKS.	178	39

METALLURGIST

*A translation of METALLURG, the monthly
industrial technical journal of the
Ministry of Iron and Steel of the USSR*

Translation published November, 1960

No. 5, pp. 181-232

May, 1959

CONTENTS

	PAGE	RUSS. PAGE
The Twelfth Congress of the Trade Unions of the USSR and the Tasks of Iron and Steel Workers.	181	1
More Automation in Industry.	184	3
Computing Machines Control Production Processes. A. V. Chelyustkin.	186	4
BLAST-FURNACE PRODUCTION		
The Automation of Blast-Furnace Production. V. Yu. Kaganov.	190	7
Measuring the Stock Level by Means of Ultrasonics. Yu. Ya. Treister.	194	11
Automation Operation of the Revolving Distributor. N. V. Mozhaev.	197	14
Automatic Recording Apparatus. V. A. Likhachev.	198	15
The Mechanization and Automation of Some Sections of the Cherepovets Metallurgical Factory. S. N. Bogopol'skii.	200	17
STEELMAKING		
The Technology of Deoxidizing and Alloying Low-Alloy Steels. B. Kh. Khan.	203	19
An Analysis of the Performance of Open-Hearth Furnaces Fired with an Oxygen-Intensified Flame M. M. Kotrovskii, M. S. Shklyar, V. G. Paramonov, and V. I. Gol'tsman.	204	21
An Automatic Heat Measuring Device for the Study of Technological Processes. Yu. B. Ostrovskii and M. Ya. Sherman.	206	23
A Rapid-Action Photoelectric Pyrometer. M. E. Gluiberzon.	208	25
The Adoption of the Valve-Change Integral Relay for Use at Small-Capacity Open-Hearth Furnaces. V. M. Studentsov.	210	26
Oxygen Lance for Breaking Down Steel Bunks. P. N. Vasenkov.	211	27
The Fourth Meeting of the Steelmaking Section of the Permanent Commission for the Iron and Steel Industry of the Council for Mutual Economic Assistance.	212	28
ROLLED STEEL AND TUBE PRODUCTION		
Photoelectric Instruments for Checking the Dimension of Rolled Sections. G. Kh. Zarezankov and R. V. Lyambakh.	215	30
The Determination and Control of the Optimum Fuel-To-Air Ratio by the Method of Seeking the Temperature Maximum. A. L. Malyi.	218	34
The Automatic Control of the Thermal Regime of Reheating Continuous and Chamber Furnaces M. D. Klimovitskii and B. I. Sinchuk.	222	38
The Operation of Automatic Thermal Equipment at the Soaking Pits. I. I. Sterlikov.	226	42
NEW TECHNIQUES		
Multilayer Sintering of a New Hearth Bottom in Open-Hearth Furnaces. I. A. Bedrik.	229	45
METALLURGY ABROAD		
The Operation of a Basic Bessemer Converter with Oxygen-Enriched Blast.	230	46
Converter Steelmaking by Means of Blowing-In Lime Dust with the Oxygen Blast.	231	46
New Books.	231	47

METALLURGIST

*A translation of METALLURG, the monthly
industrial technical journal of the
Ministry of Iron and Steel of the USSR*

Translation published November, 1960

No. 6, pp. 233-274

June, 1959

CONTENTS

	PAGE	RUSS. PAGE
The Distribution of the Iron and Steel Industry in the USSR in the Seven-Year Plan. A. B. Rosentreter	233	1
BLAST-FURNACE PRODUCTION		
Reducing the Sulfur Content in Pig Iron* G. A. Volovik	235	3
Production of Pig Iron with the Use of Coke Iron. Pak Syn Nok	237	5
Automatic Continuous Feeders. A. P. Mal'kov	240	8
STEELMAKING		
The Operation of a 1.5 Ton Basic Induction Furnace. A. F. Kablukovskii, I. P. Solodikhin, Ya. S. Leizerov, and S. D. Skorokhod	243	11
Reducing the Top-End Crop of Killed Steel Ingot. Ya. M. Levitasov, A. M. Ofengenden, and V. I. Panich	248	16
An Industrial Rotary Furnace. A. A. Garkusha and A. Z. Ryzhavskii	252	20
ROLLED STEEL AND TUBE PRODUCTION		
Hot Rolling of Thin Wide Strip on a Mill with Coilers in the Furnace. V. I. Bairakov, V. P. Fedin, V. G. Drozd, L. V. Shchepnina and S. D. Markova	255	23
Rolling Angle Sections with the Use of Repeaters. V. K. Yatsura	258	26
Tilting Machine for Inspection Beds. V. V. Trofimov	261	30
Experience on Making Couplings from Pipe. A. I. Fridland	263	32
HARDWARE PRODUCTION		
The Production of Special Dowels. Ya. Kh. Sartan	265	34
FROM THE HISTORY OF TECHNOLOGY		
The Development of the Wire-Drawing Industry. N. K. Laman	267	36
METALLURGY ABROAD		
Compacting Finely Ground Concentrates	271	39
NEW BOOKS	273	

METALLURGIST

*A translation of METALLURG, the monthly
industrial technical journal of the
Ministry of Iron and Steel of the USSR*

Translation published December, 1960

No. 7, pp. 275-318

July, 1959

CONTENTS

	PAGE	RUSS. PAGE
The Main Trend of the Seven-Year Plan.....	276	1
Keeping Up with the "Teams of Communist Labor".....	277	2
THE BLAST-FURNACE INDUSTRY		
The Temperature of Pig Iron and Slag During the Production of Conversion Pig Iron at the Magnitogorsk Metallurgical Combine. I. S. Kulikov, G. A. Sokolov, I. I. Gul'tyai, V. M. Zudin, N. N. Babarykin, and A. L. Galatov.....	279	4
Some Modifications in the Design of a Large-Capacity Blast Furnace, V. S. Brazhnik and A. L. Shcherbina.....	282	7
Equipment for a Routine Check on the Operation of Blast Furnaces, B. M. Rakovskii.....	285	10
THE STEELMAKING INDUSTRY		
Selecting the Temperature of Steel for Casting, Yu. G. Gurevich and O. F. Antropov.....	288	13
Improvements in the Method of Sintering New Furnace Bottoms, A. V. Malakha, L. M. Pokrass, I. L. Bekker, and A. M. Ofengenden.....	289	14
500-Ton Open-Hearth Furnace Fired with Coke-Oven Gas, M. I. Zlochevskii.....	292	17
ROLLED AND TUBULAR PRODUCTS		
Rolling Square Sections with Sharp Edges, N. V. Litovchenko, N. I. Sirazitdinov and L. P. Shulaev.....	297	22
Roll Design for Rolling Rectangular Sections, I. M. Konovalov and I. F. Revenko.....	300	25
Reducing the Consumption of Rolls at the Billet Mill, B. M. Ilyukovich.....	302	27
The Installation of Tube Guides Between the Stands of Mill 250, V. P. Emel'yanov.....	303	27
Aligning the Transfer Chains of Coolers, A. F. Krisanov.....	304	28
Economic Advantages of Rolling Thin-Wall Tubes on Automatic Mills, V. Ya. Ostrenko, L. D. Bobrakov, A. M. Tkachenko, and E. I. Ulinskaya.....	304	29
NEW TECHNIQUES		
An Active Innovator, N. G. Chernokhlebov.....	306	31
ORGANIZATION OF PRODUCTION IN FACTORIES		
Utilizing Potential Sources of Output Increase, V. A. Rassypnov.....	307	32
Remelting Alloy-Steel Waste into Charge Ingots, V. Z. Zykov and G. M. Levinzon.....	308	33
FROM THE HISTORY OF TECHNOLOGY		
The Tirl'yan Plate-Rolling Mill, V. G. Mel'nichuk.....	311	35
METALLURGY ABROAD		
The Use of Oxygen in Steelmaking.....	316	38
NEW BOOKS.....	318	40

Repairs to the Heating Facilities of Rolling Mills. <u>M. E. Portnoi and V. I. Zhivago</u>	483	33
Dust-Catching Device. <u>I. Ya. Yasik</u>	485	35
At the Baku Tube-Rolling Mill. <u>R. A. Faibisovich</u>	486	36
METALLURGY ABROAD		
Investigations in the Field of the Direct Reduction of Iron from Ore.	488	38
NEW BOOKS	491	40

METALLURGIST

*A translation of METALLURG, the monthly
industrial technical journal of the
Ministry of Iron and Steel of the USSR*

Translation Published March, 1961

No. 12, pp. 493-550

December, 1959

CONTENTS

	PAGE	RUSS. PAGE
A Firm Step Toward Communism	494	1
THE BLAST-FURNACE INDUSTRY		
Smelting Blast-Furnace Ferrosilicon with Oxygen-Enriched Blast. Yu. A. Popov, E. A. Gamayunov, and A. T. Filippov	497	3
Tuyere Nozzles with a Heat-Insulating Coating. V. I. Surovov, A. M. Zhak, and K. I. Kotov ...	500	6
On the Reduction of the Sulfur Content in Pig Iron. M. A. Shapovalov	502	8
I. S. Kulikov	504	10
THE STEELMAKING INDUSTRY		
New Developments for the Complex Automation of Arc Furnaces. Yu. E. Efroimovich, V. M. Vinogradov, A. F. Kablukovskii, N. I. Shutkin, N. I. Gorbatov, and T. I. Zuev	507	13
The Desirability of Using Scrap in Converter Production. S. G. Afanas'ev and B. E. Gurevich, ...	510	16
Experimental Continuous Measurement of the Temperature of Molten Steel in the Ladle and Furnace. P. Ya. Sorokin	512	19
The Performance of Roofs of Various Thicknesses in Electrical Steel-Melting Furnaces, M. N. Kaibicheva, N. A. Tulin, and N. I. Fadeeva	514	21
ROLLED AND TUBULAR PRODUCTS		
The Production of Double-Layer Sheet Steel. M. I. Bazhenov-Korchemnyi and P. N. Mazurik	516	23
On an Efficient Layout for Blooming Mills. L. V. Andreyuk	517	24
Experience on the Operation and Modernization of Three-Zone Continuous Furnaces, V. N. Medvedev, N. I. Butenko, and V. P. Murovtsev	521	28
The Mechanization of the Discharge of Steel from Continuous Furnaces before Repairs, V. G. Attaryan	524	31
Guides for Tin Plate Washing Machines. V. P. Emel'yanov	525	32
Increase of the Longevity of Steel Cables. N. N. Grishaev	525	33
NEW BOOKS		
Guides for Rolling Mills. I. S. Trishevskii	527	34
The Efficiency of Various Methods of Heating the Risers	527	34
METALLURGY ABROAD		
A Carousel-Type Furnace in a Pipe-Rolling Mill. A. Kopachek	528	35
Equipment for Insulating Pipes by Spraying in an Electrostatic Field. A. Kopachek	528	35
ERRATA	529	
TABLES OF CONTENTS, 1959	531	
AUTHOR INDEX	544	

Author Index

1959

- Afanas'ev, S. G. Fruitful Scientific and Technical Cooperation- 347
- Afanas'ev, S. G. and B. E. Gurevich The Desirability of Using Scrap in Converter Production- 510
- Afanas'ev, S. G. and G. N. Kozin. The Converter Shop of the Krivoi Rog Plant- 464
- Alimov, A. G., see Skoblo, S. Ya. - 18
